

Interpreting Line Graphs T1

17

This graph shows the outside temperature from 4pm to 10pm on a day in winter.

- What was the lowest temperature recorded on the chart?
- By how much did the temperature decrease in the first hour?
- At what time did the temperature reach freezing point?
- How far did the temperature drop between 4pm and 10pm?
- Estimate the temperature at 7.30.
- Estimate the time when the temperature was exactly -2.
- For how long was the temperature below 0?
- During which hour did the temperature fall by 2 degrees?

Extension

Draw a table to show the temperature at each hour.
