

AIR POLLUTION

Air pollution has imperiled major sports events everywhere from Canada to India with spiking levels of contaminants like PM2.5 posing a risk to players.

Did you know that air pollution comes in many forms, such as indoor and outdoors!

Air pollution can cause serious health problems to humans such as heart disease, stroke, lung cancer and stillbirths.

Clean air day is celebrated on June 18th for 2020, it's the UK's largest annual air pollution campaign

STOP DO

Waste & cycle

unnecessary driving

minimize solid fuel burning

remain indoors if it affects your health

using harsh aerosols and chemicals

idling your vehicle

invest in renewable energy

over consuming new goods

In 2021 Air Pollution led to more than 8.1 million premature deaths.
